Editor-in-Chief
Prof. Zhijian Peng  China University of Geosciences, China

Editorial Board
Dr. Kerim Aydiner  Karadeniz Technical University, Turkey
Prof. Khairun Azizi  Universiti Teknologi PETRONAS, Malaysia
Prof. Kaan Erarslan  Dumlupinar University, Turkey
Prof. B. M. Girish  East Point College of Engineering and Technology, India
Prof. M. Jayachandran  Central Electrochemical Research Institute, India
Dr. Xueyan Liu  Delft University of Technology, The Netherlands
Prof. Yilmaz Ozelik  Hacettepe University, Turkey
Dr. Partha Patra  Columbia University, USA
Prof. Gehad Mohamed Saleh  Nuclear Materials Authority (NMA), Egypt
Prof. T. N. Singh  IIT Bombay, India
Dr. Chih-Ta Tsai  National Cheng Kung University, Chinese Taipei
Prof. Vladimir E. Vigdergauz  Russian Academy of Sciences, Russia
Prof. Huaming Yang  Central South University, China
Prof. Kun Zhao  China University of Petroleum, China
Prof. Liancun Zheng  University of Science and Technology (Beijing), China
Table of Contents

Volume 7 Number 1 January 2017

Geotechnical Characterization of Jordanian Limestone
M. Dweirj, F. Fraige, H. Alnawafleh, A. Titi

Environmental Issues on the Industrial Processing of Raw Agate
F. da Silva Vilasbôas, C. R. dos Santos, I. A. H. Schneider

Novel Soil Strength Criterion Compared with Conventional Criteria
S. Shao, S. J. Shao, Y. Zhang, C. L. Chen
Geomaterials (GM)

If expert assistance is required, the services of a competent professional person should be sought.

PRODUCTION INFORMATION

For manuscripts that have been accepted for publication, please contact:
E-mail: gm@scirp.org
**Geomaterials (GM)** is open to original research articles accepting rock and soil as material. In addition to original research applications review papers and short technical notes are accepted. Geomaterials forms a platform to publish articles from experimental researches, theoretical analysis, statistical and mathematical modeling work. In addition, papers condensed on the analysis, modeling and optimization efforts in industry scale projects or applications are accepted.

**Subject Coverage**

This journal invites original research and review papers that address the following issues. Topics of interest include, but are not limited to:

- 3D modelling of ore bodies.
- Blasting performance: Rock response to blasting, fragmentation quality, seismic loading, and effects of rock structural elements in wave transmission.
- Characterization of geomaterials: Experimental methods in determining physical and mechanical parameters of geomaterials.
- Dampening and permeability properties: Seismic wave dampening characteristics, fluid, gas and radiation flow or emitting behavior of geomaterials.
- Geostatistics.
- Mine mechanization.
- Mining/extraction of geomaterials/minerals.
- Modeling the behavior of geomaterials: Results of the efforts behavior or response of geomaterials using statistical, mathematical and numerical methods.
- Monitoring behavior: Methods and equipment to monitor behavior of geomaterials.
- Results of the experimental and industrial applications: Applications focused on behavior of geomaterials.
- Size reduction: Characteristics and response to grinding effects, mechanism of processes.
- Soil behavior: Characteristics and response of soil related with the engineering processes.
- Wear and cutting behavior of geomaterials: The mechanism in drilling, cutting and sawing processes need extended work to explain the response of geomaterials to mechanical effect. Drilling, mechanical excavation, sawing and abrasive water jet machining are in the primary concern in that sense.

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the GM.

**Notes for Intending Authors**

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

**Website and E-Mail**

What is SCIRP?
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science with its publication.

What is Open Access?
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, worldwide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
