Editor-in-Chief

Prof. Michael D. Smith  University of Kent, UK

Editorial Board (According to Alphabet)

Prof. John Beckman  Spanish Astronomical Society, Spain
Prof. Vahram Chavushyan  Instituto Nacional de Astrofisica, Optic Electronica, Mexico
Prof. Osman Demircan  Canakkale University, Turkey
Prof. Antonio Elepe  University of Zaragoza, Spain
Prof. Itzhak Goldman  Afeka College, Israel
Prof. Guillermo A. Gonzalez  Universidad Industrial de Santander, Colombia
Prof. Constantine L. Goudas  University of Patras, Greece
Prof. Anatol Guglielmi  Russian Academy of Sciences, Russia
Prof. Richard Brice Hoover  National Space Science and Technology Center, USA
Prof. Nadejda T. Kaltcheva  University of Wisconsin Oshkosh, USA
Prof. Rafik A. Kandalyan  Byurakan Astrophysical Observatory, Armenia
Dr. Vladimir Kondratyev  Taras Shevchenko National University of Kiev, Ukraine
Prof. Alexander M. Krymskii  Southern Federal University, Russia
Prof. Jonathan Peter Merrison  Mars Simulation Wind Tunnel Facilities, UK
Prof. Ratan Mohapatra  University of Ottawa, Canada
Prof. David Fonseca Mota  University of Oslo, Norway
Prof. Gopalakrishnara Parthasarathy  National Geophysical Research Institute (CSIR), India
Prof. Sudip Sen  Lancaster University, UK
Prof. Andrew Shearer  National University of Ireland, Ireland
Prof. Yuriy G. Shkuratov  Kharkov National University, Ukraine
Prof. J. W. F. Valle  Spanish National Research Council, Spain
# TABLE OF CONTENTS

**Volume 3    Number 3    September 2013**

What Is the Missing Dark Energy in a Nutshell and the Hawking-Hartle Quantum Wave Collapse  
M. S. El Naschie .................................................................................................................. 205

Solar Activity during the Rising Phase of Solar Cycle 24  
A. Sharma, S. R. Verma .................................................................................................................. 212

Computing Differentially Rotating Neutron Stars Obeying Realistic Equations of State  
by Using Hartle’s Perturbation Method  
A. Katelouzos, V. Geroyannis .................................................................................................................. 217

Antigravity—Its Manifestations and Origin  
M. Kržík, L. Somer .................................................................................................................. 227

Nexus: A Quantum Theory of Space-Time, Gravity and the Quantum Vacuum  
S. Marongwe .................................................................................................................. 236

Window Effect in the Power Spectrum Analysis of a Galaxy Redshift Survey  
T. Sato, G. Hütsi, G. Nakamura, K. Yamamoto .................................................................................................................. 243

Mass as the Fifth Dimension of the Universe  
B. Nikouravan, J. J. Rawal .................................................................................................................. 257

Are Uranus & Neptune Responsible for Solar Grand Minima and Solar Cycle Modulation?  
G. J. Sharp .................................................................................................................. 260

Study of Duct Characteristics Deduced from Low Latitude Ground Observations  
of Day-Time Whistler at Jammu  
M. Altaf, M. M. Ahmad .................................................................................................................. 274

The Effect of Radiogenic Heating on the Amino Acid Content of an Early Cometary Body  
C. Canepa .................................................................................................................. 278

The Cherenkov Radiation in the Galaxy’s Halo of Dark Matter  
Leonid M. Chechin .................................................................................................................. 285

Analysis of the Effect of Space Radiations on the Nematode, *Caenorhabditis elegans*,  
through the Simulated Space Radiation  
S. Yi, S. Kim, J. Song .................................................................................................................. 291

Cosmology Should Directly Use the Doppler’s Formula to Calculate the Red Shift of Ia Supernova  
X. C. Mei, P. Yu .................................................................................................................. 303

Dark Energy Explained via the Hawking-Hartle Quantum Wave and the Topology  
of Cosmic Crystallography  
M. S. El Naschie, A. Helal .................................................................................................................. 318

Influence of Supernova SN Ia Rate and the Early Star Formation Rate on the  
Galactic Chemical Evolution  
S. Sahijpal .................................................................................................................. 344

Renormalized Coordinate Stretching: A Generalization of Shoot and Fit with  
Application to Stellar Structure  
P. D. Usher .................................................................................................................. 353

Thermonuclear Reaction as the Main Source of the Earth’s Energy  
E. I. Terez, I. E. Terez .................................................................................................................. 362

PRODUCTION INFORMATION

For manuscripts that have been accepted for publication, please contact:
E-mail: ijaa@scirp.org
International Journal of Astronomy and Astrophysics (IJAA) is an international scientific journal dedicated to the publication and public discussion of high quality original research in all the fields of astrophysics and space sciences and related technology. All the manuscripts must be prepared in English, and are subject to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by printed hard copies.

Editor-in-Chief
Prof. Michael D. Smith
University of Kent, UK

Editorial Board
Prof. John Beckman
Prof. Vahe Ram Chavushyan
Prof. Osman Demircan
Prof. Antonio Ellepe
Prof. Itzhak Goldman
Prof. Guillermo A. Gonzalez
Prof. Constantine L. Goudas

Prof. Anatol Guglielmi
Prof. Richard Brice Hoover
Prof. Nadejda T. Kaltcheva
Prof. Rafik A. Kandalyan
Dr. Vladimir Kondratyev
Prof. Alexander M. Krymski
Prof. Jonathan Peter Murrison

Prof. Ratan Mohapatra
Prof. David Fonseca Mota
Prof. Gopalakrishnarao Parthasarathy
Prof. Sudip Sen
Prof. Andrew Shearer
Prof. Yuriy G. Shkuratov
Prof. J. W. F. Valle

Subject Coverage
The journal publishes original papers including but not limited to the following fields:

- Astrogaeodynamics
- Astrophysics
- Cosmic Rays and Gamma Astronomy
- Dynamics of Celestial Bodies in the Solar System and Artificial Bodies
- Extrasolar Planets
- Formation and Evolution of Galaxies and Their Clusters
- Formation and Evolution of Stars
- Holohermic Physics
- High-Energy and Cataclysmic Processes in Astrophysics
- Interstellar Matter
- Interstellar Medium: Star Formation Regions
- Kinematics and Structure of the Galaxy
- Large-Scale Structure of Universe Formation and Evolution of Galaxies
- Last Stages of Stellar Evolution and Chemical Evolution of the Galaxy
- Magnetospheric Physics
- Microquasars and High-Energy Astrophysics
- Neutron Astronomy
- New Astronomical Techniques and Methods
- Planets, Comets, Asteroids and Dust
- Pulsar Magnetospheres
- Solar and Stellar Physics
- Solar Magnetic Activity and Heliogeospace Environments
- Solar/Interstellar Terrestrial Relations
- Solar-Terrestrial Physics and Space Weather
- Space Observation and Exploration
- Supernovae and Evolution of the Universe

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the IJAA.

Notes for Intending Authors
Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
