# TABLE OF CONTENTS

**Volume 4  Number 7A1**  
**July 2013**

**Singularity-Free Superstar as an Alternative to Black Hole and Gravastar**  
D.-Y. Chung, V. Krasnoholovets ................................................................. 1

**Cosmic Illusions**  
B. H. Lavenda ............................................................................................... 7

**Cosmology with Bounce by Flat Space-Time Theory of Gravitation and a New Interpretation**  
W. Petry ........................................................................................................ 20

**Application of the Non-Local Physics in the Theory of Gravitational Waves and Big Bang**  
B. V. Alexeev ................................................................................................ 26

**Application of the Non-Local Physics in the Theory of the Matter Movement in Black Hole**  
B. V. Alexeev ................................................................................................ 42

**Supermassive Black Holes, Large Scale Structure and Holography**  
T. R. Mongan ............................................................................................... 50

**Modeling the Black Hole Recoil from the Nucleus of M83**  
G. G. Ferrari, H. Dottori, R. J. Diaz ............................................................ 55

**Supermassive Black Holes, the Early Universe, and Gamma-Ray Bursts**  
S. Al Dallal, W. J. Azzam ............................................................................ 64

**The Light-Dark Dual Universe for the Big Bang and Dark Energy**  
D.-Y. Chung, V. Krasnoholovets ................................................................. 77

**Dark Particles Answer Dark Energy**  
J. L. Haller Jr ............................................................................................... 85

Journal of Modern Physics (JMP) is an international journal dedicated to the latest advancement of modern physics. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of modern physics.

Subject Coverage

Journal of Modern Physics publishes original papers including but not limited to the following fields:

- Biophysics and Medical Physics
- Complex Systems Physics
- Computational Physics
- Condensed Matter Physics
- Cosmology and Early Universe
- Earth and Planetary Sciences
- General Relativity
- High Energy Astrophysics
- High Energy/Accelerator Physics
- Instrumentation and Measurement
- Interdisciplinary Physics
- Materials Sciences and Technology
- Mathematical Physics
- Mechanical Response of Solids and Structures
- New Materials: Micro and Nano-Mechanics and Homogeneization
- Non-Equilibrium Thermodynamics and Statistical Mechanics
- Nuclear Science and Engineering
- Optics
- Physics of Nanostructures
- Plasma Physics
- Quantum Mechanical Developments
- Quantum Theory
- Relativistic Astrophysics
- String Theory
- Superconducting Physics
- Theoretical High Energy Physics
- Thermology

We are also interested in: 1) Short Reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews—Comments and critiques.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

What is SCIRP?
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

What is Open Access?
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
