Editor-in-Chief
Prof. Jorge M. Seminario  Texas A&M University, USA

Editorial Board
Dr. Masoud Allahkarami  Oklahoma State University, USA
Dr. Mukannan Arivanandhan  Shizuoka University, Japan
Dr. Elias J. Fernandez  University of Tennessee, USA
Dr. Hédi Fitouri  University of Monastir, Tunisia
Dr. Jade Kenneth Forwood  Charles Sturt University, Australia
Dr. Rainer Ernst Glaser  University of Missouri-Columbia, USA
Prof. Ching-Hwa Ho  National Taiwan University of Science and Technology, Chinese Taipei
Dr. Michele Iafisco  Institute of Science and Technology for Ceramics, Italy
Dr. Srinivas Janaswamy  Purdue University, USA
Dr. Vimal S. Joshi  Gujarat University, India
Dr. Wen Lei  Australian National University, Australia
Dr. Teo Kie Leong  National University of Singapore, Singapore
Dr. J. M. Delgado López  CSIC-University of Granda, Spain
Prof. P. K. Mandal  University of North Bengal, India
Dr. Eric W. Reinhermer  California State University, USA
Prof. Bernard D. Santarsiero  University of Illinois at Chicago, USA
Dr. Aidong Shen  The City College of the City University of New York, USA
Dr. Dashuang Shi  George Washington University, USA
Dr. Hailong Zhou  University of California at Los Angeles, USA
# TABLE OF CONTENTS

Volume 2 Number 3 September 2013

## Ce-SAD Phasing of Glucose Isomerase and Thermolysin Using Cu Kα Radiation
S. Narayanan, D. Velmurugan

## ZnO Heteroepitaxy on Sapphire Using a Novel Buffer Layer of Titanium Oxide: Optoelectronic Behavior
S. Yamauchi, Y. Imai

## Pseudosymmetric Features and Nonlinear Optical Properties of Potassium Titanyl Phosphate Crystals
A. P. Gazhulina, M. O. Marychev

## Crystal Structure of 3-Amino-5,6-Dimethyl-2-Nitrobiphenyl-4-Carbonitrile
W. Q. Zhang

## A Hirshfeld Surface Analysis and Crystal Structure of 2’-[1-(2-Fluoro-Phenyl)-1H-tetrazol-5-yl]-4-Methoxy-Biphenyl-2-Carbaldehyde
S. Madan Kumar, B. C. Manjunath, G. S. Lingaraju, M. M. Abdoh, M. P. Sadashiva, N. K. Lokanath

## Investigation of Some Structural and Mechanical Properties of Ba_{0.5}Ca_{0.5-x}Sr_xTiO_3 Ceramics
L. M. Sharaf El-Deen, M. H. Badr, A.-M. H. Khafagy, D. U. Nassar

PRODUCTION INFORMATION

For manuscripts that have been accepted for publication, please contact:
E-mail: esta@scirp.org
Crystal Structure Theory and Applications (CSTA) is an open access journal published quarterly. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in all aspects of crystal structure theory and applications.

Subject Coverage

All manuscripts must be prepared in English, and are subject to a rigorous peer-review process. Accepted papers will immediately appear online followed by printed in hard copy. The areas covered by Crystal Structure Theory and Applications (CSTA) include but are not limited to the following fields:

- Application of Crystals
- Atomic Coordination
- Bravais Lattices
- Crystal Growth Techniques and Phenomena (including Bulk Growth, Thin Films)
- Crystal Structure Prediction
- Crystal Structures Cleavage
- Crystallographic Computing
- Defects and Impurities of Crystal Structures
- Determination of Crystal Structures
- Experimental Crystallography and Biocrystallography
- Grain Boundaries
- Industrial Crystallisation
- Lattice Systems
- New Crystal Structures (including Liquid Crystals, Nanocrystals, Quasicrystals)
- Nucleation Theory
- Optical Properties of Crystal Structures
- Physical Properties of Crystal Structures
- Point Groups
- Polymorphism
- Simulation and Model of Crystal Structures
- Space Groups

We are also interested in: 1) Short reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book reviews—Comments and critiques.

**What is SCIRP?**

Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

**What is Open Access?**

All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
