Computational Water, Energy, and Environmental Engineering
Honorary Editor-in-Chief
Prof. Ahmad Qasaimeh  
Jerash University, Jordan

Editorial Advisory Board
Prof. Marek Balazinski  
École Polytechnique de Montréal, Canada
Prof. Maria Elektorowicz  
Concordia University, Canada
Prof. Patrick Hettiaratchi  
University of Calgary, Canada
Prof. Jasiuk Iwona  
University of Illinois at Urbana-Champaign, USA

Editorial Board
Prof. Mohammad Raji Abdallah  
AL-Huson University College (AL-Balqa Applied University), Jordan
Prof. Inteaz Alli  
McGill University, Canada
Prof. Muhammad H. Al-u’datt  
Jordan University of Science and Technology, Jordan
Prof. Radian G. Belu  
Drexel University, USA
Prof. Hyeok Choi  
University of Texas at Arlington, USA
Dr. Chua Kian Jon Ernest  
National University of Singapore, Singapore
Prof. Ching-Hwa Ho  
National Taiwan University of Science and Technology, Chinese Taipei
Dr. Xi Lu  
School of Engineering and Applied Sciences Harvard University, USA
Prof. Kaveh Madani  
University of Central Florida, USA
Prof. Josué Medellín-Azuara  
University of California, USA
Prof. M. J. (Mike) Pasqualetti  
Arizona State University, USA
Prof. Rehan Sadiq  
The University of British Columbia, Canada
Prof. Ahmet Z. Sahin  
King Fahd University of Petroleum and Minerals, Saudi Arabia
Dr. Kaimin Shih  
The University of Hong Kong, China
Dr. S. Vasudevan  
CSIR—Central Electrochemical Research Institute, India
Prof. Lihua Yang  
Beihang University, China
# Table of Contents

**Volume 6  Number 1  January 2017**

A Study on Importance and Role of Irrigation and Hydropower Plant Operation in Integrated River Basin Management  
C. Koç .......................................................... 1

A Quantitative Assessment Framework for Water, Energy and Food Nexus  
A. Karnib ............................................................................................................. 11

Application of SWAT to Assess the Effects of Land Use Change in the Murchison Bay Catchment in Uganda  
L. A. Anaba, N. Banadda, N. Kiggundu, J. Wanyama, B. Engel, D. Moriasi .............................................. 24

Locating of Wind Power Farms by Analytic Hierarchy Process Method (Case Study: Sistan and Baluchistan Province, Iran)  
M. Asadi, M. Karami ............................................................................................................. 41

Two-Dimensional Modeling of the NAPL Dissolution in Porous Media: Heterogeneities Effects on the Large Scale Permeabilities and Mass Exchange Coefficient  
B. Mabiala, T. Nsongo, D. N. Tomodiatounga, C. Tathy, D. Nganga ................................................. 56

Effect of Reference Conveyance Parameter Usage on Real Time Canal Performance: The Case of Fentale Irrigation Scheme in Ethiopia  
M. Mohammed, A. Tefera ................................................................................................. 79

Reuse of Ferric Sludge by Ferrous Sulfide in the Fenton Process for Nonylphenol Ethoxylates Wastewater Treatment  
R. Y. Zhou, W. Q. Zhang ................................................................................................. 89

Modeling the Pressure Distribution and the Changes of Water Level around the Offshore Platforms Exposed to Waves, Using the Numerical Model of Flow 3D  
M. Rashidinasab, M. B. Askar ................................................................................................. 97
Prediction of Salinity Variations in a Tidal Estuary Using Artificial Neural Network and Three-Dimensional Hydrodynamic Models

W. B. Chen, W. C. Liu, W. C. Huang, H. M. Liu

“Water-Colouring” and Geomorphologic Features of the Marl Hills in Changing Quality of Soil and Water

L. Montaseri, A. Amirahmadi, M. Z. Asadi, M. Karami
Computational Water, Energy, and Environmental Engineering (CWEEE)

Disclaimer of liability
Statements and opinions expressed in the articles and communications are those of the individual contributors and not the statements and opinion of Scientific Research Publishing, Inc. We assume no responsibility or liability for any damage or injury to persons or property arising out of the use of any materials, instructions, methods or ideas contained herein. We expressly disclaim any implied warranties of merchantability or fitness for a particular purpose. If expert assistance is required, the services of a competent professional person should be sought.

PRODUCTION INFORMATION

For manuscripts that have been accepted for publication, please contact:
E-mail: cweee@scirp.org
CWEEE is an international refereed journal keen to innovation, creativity, and novelty in water, energy, and environmental engineering. This journal aims to attain the state-of-the-art technology in managing resources and energy. The subject of the journal entails solving problems and utilizing benefits of components in atmosphere, hydrosphere, lithosphere, and biosphere ecosystems.

Subject Coverage

The journal implies practical and computational processes in water, air, soil, and living species. In addition, it focuses on the recent developments of renewable energy such as solar energy, wind energy, hydro-energy, hybrid energy, geothermal energy, and bio-energy. The theme of the journal covers, but not limited to the following domains:

- Water, Energy, and Environmental Artificial Intelligence and Evolution Application
- Water, Energy, and Environmental Bio-Informatics Application
- Water, Energy, and Environmental Black Box Modeling Systems
- Water, Energy, and Environmental Control and Management
- Water, Energy, and Environmental Data Acquisition and Remote Sensing
- Water, Energy, and Environmental Decision Support Systems
- Water, Energy, and Environmental Expert Systems
- Water, Energy, and Environmental Forecasting
- Water, Energy, and Environmental Fuzzy Logic Application
- Water, Energy, and Environmental Genetic Algorithms Application
- Water, Energy, and Environmental Information Systems
- Water, Energy, and Environmental Knowledge Base and Data Hierarchy
- Water, Energy, and Environmental Modeling and Simulation
- Water, Energy, and Environmental Neural Networks Application
- Water, Energy, and Environmental Optimization
- Water, Energy, and Environmental Software and Visualization Application
- Water, Energy, and Environmental Statistics

We are also interested in: 1) Short reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book reviews—Comments and critiques.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

Website and E-Mail

**What is SCIRP?**

Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science with its publication.

**What is Open Access?**

All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, worldwide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
