Journal of Biophysical Chemistry (JBPC) is an international journal dedicated to the latest advancement in related research fields. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different aspects of biophysical chemistry.

Subject Coverage
This journal invites original research and review papers that address the following issues. Topics of interest include, but are not limited to:

- Biomolecular and Drug Databases
- Biomolecular Free Energy
- Biomolecular Modeling
- Biomolecular Structure
- Computational Biology
- Computational Chemistry
- Covering Dynamics
- Gene Regulation
- Graph/Network Theory
- Medicine and Neuroscience
- Molecular Docking
- Molecular Dynamics Simulation
- Molecular Evolutionary Genetics
- Neural Networks
- Nucleic Acid Structure
- Patch Clamping
- Pharmacology and Physiology
- Quantum Chemistry
- Sequence Alignment
- Single Protein Dynamics
- siRNA
- Soft Matter Physics
- Stochastic Processes
- Structural Alignment
- Structural Biology
- Structure-Activity Relationships

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the JBPC.

Notes for Intending Authors
Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
