# Table of Contents

**Volume 3   Number 5   May 2015**

Deep Packet Inspection Based on Many-Core Platform  
Y.-R. Zhan, Z.-S. Wang..............................................................................................................................1

A User Proprietary Obfuscate System for Positions Sharing in Location-Aware Social Networks  
W. C. Cheng, M. Aritsugi..........................................................................................................................7

Establishment and Application of Cryptographic Library Model  
T.-M. Liu, L.-H. Jiang, J. Jing, Y.-Y. Zhang..........................................................................................21

Cluster Analysis Based on Contextual Features Extraction for Conversational Corpus  
Q. Chen, Y. Chen, M. H. Jiang................................................................................................................33

Adaptive Smoothing Method Based on Fuzzy Theory Study and Realization  
Y. Wan, C. L. Hu......................................................................................................................................38

Software Components Behavioral Adaptation Based on LTS  
C. Zhang..................................................................................................................................................44

Parallel Cascade Correlation Neural Network Methods for 3D Facial Recognition: A Preliminary Study  
S. M. Al-Qatawneh, K. M. Jaber............................................................................................................54

Hybrid ARIMA/RBF Framework for Prediction BUX Index  
D. Marček................................................................................................................................................63

Parallel Response Ternary Query Tree for RFID Tag Anti-Collision  
C.-N. Yang, S.-R. Cai, L.-Z. Sun..............................................................................................................72

Recent Advances of Sensors for Assistive Technologies  
W. (Vivien) Shi........................................................................................................................................80

Cluster Analysis of Electrical Behavior  
L. Liu.......................................................................................................................................................88

Seismic Data Collection with Shakebox and Analysis Using MapReduce  
B. Tang, J. C. Han, M. Beheshti, G. Poppe, L. Nguekap, R. Siddiqui.....................................................94

Characteristic Analysis of Transient Electromagnetic Disturbance Data in Substation  
X. Wu, S. Li..............................................................................................................................................102
Building a Productive Domain-Specific Cloud for Big Data Processing and Analytics Service
Y. Z. Yan, M. Hanifi, L. Q. Yi, L. Huang

Linked Data Based Framework for Tourism Decision Support System:
Case Study of Chinese Tourists in Switzerland
Z. Liu, A. Le Calvé, F. Cretton, N. Glassey Balet, M. Sokhn, N. Délétroz

Performance Research on Magnetotactic Bacteria Optimization Algorithm
with the Best Individual-Guided Differential Interaction Energy
H. W. Mo, L. L. Liu, J. Zhao

Content Authoring and Cloud System Implementation for Smart Learning

Digital Dashboards for Smart City Governance: A Case Project to
Develop an Urban Safety Indicator Model
A. De Marco, G. Mangano, G. Zenezini

Fuel Consumption System
Y.-J. Chen, C.-H. Chien

Design and Implementation of a Wireless Networked Water Level Control System
L. X. Lu, R. Lewis, M. Hu, R. Lin

Internet of Things (IoT): A Literature Review
S. Madakam, R. Ramaswamy, S. Tripathi

A Way to Set up Security Layer over Internet
X. Y. Hu, G. F. Zhao, G. Xu

Image Registration Technique Based on a Fast CPD Algorithm
W. G. Liu, T. Wang

Big Data Stream Analytics for Near Real-Time Sentiment Analysis
O. K. M. Cheng, R. Lau

Hadoop-Based Similarity Computation System for Composed Documents

The Design and Research for Network Address Space Randomization in OpenFlow Network
Z. Y. Zhao, Y. B. Guo, W. Liu

Approach to Model-Based Development of Context-Aware Application
I. Jaouadi, R. B. Djemaa, H. B. Abdallah
Tracking Galloping Profile of Transmission Lines Using Wireless Inertial Measurement Units

K. Xie, C. Zhang, Q. Li, W.-L. Wu, Y.-Q. Ni

Role of Internet of Things in the Smart Grid Technology

A. R. Al-Ali, R. Aburukba

The Price Forecasting of Military Aircraft Based on SVR

J. F. Tong, J. X. Du, P. Chen, J. G. Yuan, Z. Huan
Call for Papers

Journal of Computer and Communications

ISSN: 2327-5219 (Print)    ISSN: 2327-5227 (Online)
http://www.scirp.org/journal/jcc

Journal of Communications and Computers is an international journal dedicated to the latest advancement of communications and computers. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of computer and communications. All manuscripts must be prepared in English, and are subject to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by printed hard copy. The journal publishes original papers including but not limited to the following fields:

Subject Coverage

The journal publishes original papers including, but not limited to, the following subfields of anthropology:

- Applications of Communication Systems
- Artificial Intelligence
- Big Data Search and Mining
- Cloud Computing
- Communication Protocols
- Complex Network Models
- Computational Robotics
- Computer and Network Security
- Computer Graphics and Visualization
- Computer Vision
- Cooperative Communications
- Distributed Computing
- Green Networking
- Grid Computing
- High Performance Computing
- Image Processing
- Information and Communication Theory and Algorithms
- Information and Communication: Security, Privacy, and Trust
- Information Retrieval
- Mobile and Portable Communications Systems
- Mobile and Ubiquitous Networks
- Mobile Computing Systems
- Multimedia/Signal Processing
- Network Modeling and Simulation
- Numerical Methods
- Online Social Network Computing
- Optical Communications
- Self-Stabilization, Autonomic Computing
- Simulation/Analytical Evaluation of Communication Systems

We are also interested in: 1) Short Reports – 2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews – Comments and critiques.

Website and E-Mail

What is SCIRP?
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science with its publication.

What is Open Access?
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, worldwide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
