Editor in Chief
Dr. Bouzid Menaa  Fluorotronics Inc., USA

Editorial Board
Prof. Salah Aida  University of Constantine, Algeria
Alicia Esther Ares  University of Misiones, Argentina
Dr. Arul C. Arjunan  Sinmat Inc., USA
Dr. R. Gopalakrishnan  Anna University, India
Dr. Wen Lei  Australian National University, Australia
Prof. Shu-Shen Lu  Sun Yat-sen University, China
Prof. Krishna C. Mandal  University of South Carolina, USA
Dr. Klaus Merz  University of Bochum, Germany
Dr. Radoljub I. Ristic  The University of Sheffield, UK
Prof. Camillo Rosano  National Institute for Cancer Research, Italy
Prof. Garth Simpson  Purdue University, USA
Prof. Vitalyi Igorevich Talanin  Zaporozhye Institute of Economics and Information Technologies, Ukraine
Prof. Rina Tannenbaum  University of Alabama at Birmingham, USA
Ramaiyer Venkatraman  Jackson State University, USA
Dr. Sunil Verma  Raja Ramanna Centre for Advanced Technology, India
## TABLE OF CONTENTS

**Volume 3 Number 2**

**April 2013**

<table>
<thead>
<tr>

PRODUCTION INFORMATION

For manuscripts that have been accepted for publication, please contact:
E-mail: jcpt@scirp.org
**Journal of Crystallization Process and Technology (JCPT)** is an international, specialized, English-language journal devoted to publication of original contributions concerning with the crystallization process, studies and properties of the crystalline materials.

**Subject Coverage**

It is an open-access, peer-reviewed journal describing scientific and technological advances that cover the basic sciences, engineering aspects and applied technology of crystals and crystallization processes:

- Crystals Growth, Design and Properties for Applications in Medical Sciences with Organic and Biological Substances Crystallization; Biominerilization; Opto-Electronics with Semiconductors, Superconductors, Magnetics, Inorganic and Inorhatic-Organic Hybrid Materials Crystallization.

- Characterization by Physical and Chemical Methods; Apparatus, Instrumentation and Techniques for Crystal Growth, and Purification Methods.

- Crystallization as Bulk or Thin Films; Crystallization in Polymers, Liquid Crystals, Crystallization in Sol-Gel Glasses and Viscous Media.

- Crystallization Processes Including among Others Chemical Vapor Deposition, Hydrothermal, Organic, Solvent and Solvent-Free Processes.

The journal publishes the highest quality original full articles, communications, notes, reviews, special issues and books, covering both the experimental and theoretical aspects including physical, chemical, and biological phenomena and processes related to the design, growth, and application of crystalline materials. Contributions can concern also with the fundamental concepts of crystal growth and the understanding of the relationship between crystal growth conditions and resulting properties of the crystal:

- Intermolecular Interactions in the Solid State.
- Modeling of Crystal Growth Processes.
- Nucleation Theory.
- Transport Phenomena in Crystal Growth.

Papers are acceptable provided they report important findings, novel insights or useful techniques within the scope of the journal. All manuscript must be prepared in English, and are subjected to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by prints in hard copy.

**Notes for Intending Authors**

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

**Website and E-Mail**

What is SCIRP?
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

What is Open Access?
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
