# Table of Contents

**Volume 9    Number 6    May 2018**

**Can Really Regularized Amplitudes Be Obtained as Consistent with Their Expected Symmetry Properties?**  
O. A. Battistel, G. Dallabona, M. V. Fonseca, L. Ebani ................................................................. 1153

**Plank Scale with Siva’s Constant “K”—A New Road to Grand Unification**  
S. P. Kodukula ........................................................................................................................................ 1179

**The Gravitational Radiation Emitted by Two Quasi-Particles around a Schwarzschild Black Hole**  
A. S. Kubeka ........................................................................................................................................ 1195

**Euclidean Model of Space and Time**  
R. Machotka ........................................................................................................................................ 1215

**Cosmic Continuum Theory: A New Idea on Hilbert’s Sixth Problem**  
X. J. Wang ........................................................................................................................................ 1250

**Quasi-Chemical Reactions in Irradiated Silicon Crystals with Regard to Ultrafast Irradiation**  
H. N. Yeritsyan, A. A. Sahakyan, N. E. Grigoryan, V. V. Harutyunyan, B. A. Grigoryan, G. A. Amatuni,  
A. S. Yeremyan, C. J. Rhodes ............................................................................................................. 1271

**On Gravitational Waves: Did We Simply Detect the Gravitational Effect of the Sun on the Photons Moving in the Cavity of Interferometers LIGO and VIRGO?**  
A. C. Elbeze ........................................................................................................................................ 1281

**Laser-Assisted Generation and Detection of Non-Nuclear Low-Energy Neutrino-Antineutrino Beams**  
J. W. Eerkens ........................................................................................................................................ 1291

**A Note on the Lie Algebra of the Invariants in the CBS Nonlinear Equation**  
J. M. Cerveró ........................................................................................................................................ 1297

**Many-Body-Gravitational Solutions for Galactic Rotational Velocities, Including Possible Negative Mass**  
A. J. Bourdillon ........................................................................................................................................ 1304
A De Sitter-Hubble Equation, the Force in Special Relativity and Some Concepts on Symmetry
J. G. Lartigue

Misconceptions of Universe Expansion, Accelerated Universe Expansion, and Their Sources. Virtual Reality of Inflationary Cosmology
G. von Brzeski, V. von Brzeski

The figure on the front cover is from the article published in Journal of Modern Physics, 2018, Vol. 9, No. 6, pp. 1215-1249 by Radovan Machotka.
Journal of Modern Physics (JMP)

PRODUCTION INFORMATION

For manuscripts that have been accepted for publication, please contact:
E-mail: jmp@scirp.org
Journal of Modern Physics (JMP) is an international journal dedicated to the latest advancement of modern physics. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of modern physics.

Editor-in-Chief
Prof. Yang-Hui He
City University, UK

Executive Editor-in-Chief
Prof. Marko Markov
Research International, Buffalo Office, USA

Subject Coverage
Journal of Modern Physics publishes original papers including but not limited to the following fields:

- Biophysics and Medical Physics
- Complex Systems Physics
- Computational Physics
- Condensed Matter Physics
- Cosmology and Early Universe
- Earth and Planetary Sciences
- General Relativity
- High Energy Astrophysics
- High Energy/Accelerator Physics
- Instrumentation and Measurement
- Interdisciplinary Physics
- Materials Sciences and Technology
- Mathematical Physics
- Mechanical Response of Solids and Structures
- New Materials: Micro and Nano-Mechanics and Homogeneization
- Non-Equilibrium Thermodynamics and Statistical Mechanics
- Nuclear Science and Engineering
- Optics
- Physics of Nanostructures
- Plasma Physics
- Quantum Mechanical Developments
- Quantum Theory
- Relativistic Astrophysics
- String Theory
- Superconducting Physics
- Theoretical High Energy Physics
- Thermology

We are also interested in: 1) Short Reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews—Comments and critiques.

Notes for Intending Authors
Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

Website and E-Mail
http://www.scirp.org/journal/jmp  E-mail: jmp@scirp.org
What is SCIRP?
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science with its publication.

What is Open Access?
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, worldwide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
