Table of Contents

Volume 10 Number 8 July 2017

Algebraic or Algorithmic: Searching for Optimal Solutions in Multi-Stage Supply Chain Models
A. R. Ahmad, B. Mohamad, S. M. Halawani

A Structural and Generative Approach to Multilayered Software Architectures
G. E. Kouamou, W. K. Kungne

The ISBSG Software Project Repository: An Analysis from Six Sigma Measurement Perspective for Software Defect Estimation
M. Almakadme, A. Abran

An Augmented Framework for Formal Analysis of Safety Critical Systems
M. Singh, V. K. Jain

From Mechatronic Components to Industrial Automation Things: An IoT Model for Cyber-Physical Manufacturing Systems
T. Foradis, K. Thramboulidis

Dual Visual Cryptography Using the Interference Color of Birefringent Material
H. Qin, T. Matsusaki, Y. Momoi, K. Harada
Journal of Software Engineering and Applications (JSEA)

PRODUCTION INFORMATION

For manuscripts that have been accepted for publication, please contact:
E-mail: jsea@scirp.org
Journal of Software Engineering and Applications (JSEA)

ISSN 1945-3116 (print)  ISSN 1945-3124 (online)
http://www.scirp.org/journal/jsea

JSEA publishes four categories of original technical articles: papers, communications, reviews, and discussions. Papers are well-documented final reports of research projects. Communications are shorter and contain noteworthy items of technical interest or ideas required rapid publication. Reviews are synoptic papers on a subject of general interest, with ample literature references, and written for readers with widely varying background. Discussions on published reports, with author rebuttals, form the fourth category of JSEA publications.

Subject Coverage

All manuscripts must be prepared in English, and are subject to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by printed hard copy. The journal publishes original papers including but not limited to the following fields:

Automated Software Design and Synthesis  Requirements Engineering
Automated Software Specification  Reverse Engineering
Component-Based Software Engineering  Software Architecture
Computer-Supported Cooperative Work  Software Design Methods
Formal Methods  Software Domain Modeling and Meta-Modeling
Knowledge Acquisition  Software Engineering Decision Support
Object-Oriented Technology  Software Engineering Education
Patterns and Frameworks  Software Maintenance and Evolution
Process and Workflow Management  Software Process Modeling
Program Understanding Issues  Software Quality
Programming Languages and Software Engineering  Software Reuse
Reflection and Metadata Approaches  Software Testing
Reliability and Fault Tolerance  Tutoring, Help, Documentation Systems

We are also interested in short papers (letters) that clearly address a specific problem, and short survey or position papers that sketch the results or problems on a specific topic. Authors of selected short papers would be invited to write a regular paper on the same topic for future issues of the JSEA.

Notes for Prospective Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
