Table of Contents

Volume 5  Number 4  October 2015

Adsorption of CO, CO₂, NO and NO₂ on Carbon Boron Nitride Hetero Junction: DFT Study
A. A. El-Barbary, Kh. M. Eid, M. A. Kamel, H. O. Taha, G. H. Ismail.................................................................169

The Inhibition Effect of Cinnamon Extract on Leaching of Aluminum Cook Wares in NaCl Solutions at Quasi-Cooking Condition
L. A. Al Juhaiman, R. A. Al-Shihry, H. M. Al Hazmei..............................................................................................177

Polyamide Fibers Covered with Chlorhexidine: Thermodynamic Aspects
E. Giménez-Martín, M. López-Andrade, J. A. Moleón-Baca, M. A. López, A. Ontiveros-Ortega...............................190

Electrodeposition of Gold to Conformally Fill High-Aspect-Ratio Nanometric Silicon Grating Trenches: A Comparison of Pulsed and Direct Current Protocols
S. Znati, N. Chedid, H. Miao, L. Chen, E. E. Bennett, H. Wen..................................................................................207

Effect of Heat Treatment Parameters on the Mechanical and Microstructure Properties of Low-Alloy Steel
M. H. Frihat.................................................................................................................................................................214

Metal Fluorides Produced Using Chlorine Trifluoride Gas
H. Matsuda, H. Habuka, Y. Ishida, T. Ohno...........................................................................................................228

PRODUCTION INFORMATION

For manuscripts that have been accepted for publication, please contact:
E-mail: jsemat@scirp.org
Journal of Surface Engineered Materials and Advanced Technology (JSEMAT) is an international, specialized, English-language journal devoted to publication of original contributions concerning surface sciences, surface properties, techniques of characterization and generated applications.

It is an open-access, peer-reviewed journal describing scientific and technological advances that cover the basic sciences, engineering aspects and applied technology of surface chemistry, surface materials sciences and engineering studies for applications in nanotechnology, biomaterials, optics, environment, architectural restoration including all kind of materials surfaces.

**Subject Coverage**

The journal publishes the highest quality original full articles, communications, notes, reviews, special issues and books, covering both the experimental and theoretical aspects including but not limited to:

- Adsorption Process and Principles
- Advances in Adhesion Sciences
- Interface Sciences and Applications
- Intermolecular Interactions
- Kinetics and Thermodynamics at Surfaces
- Modeling Theory of Surface Chemistry
- Single Molecule Force Spectroscopy
- Surface Biocompatibility
- Surface Characterization and Advanced Techniques
- Surface Corrosion
- Surface Crystallization
- Surface Hydration at Solid/Liquid Interface
- Surface Interactions at Bio-Interfaces
- Surface Interactions at the Nanoscale
- Surface Microscopy (SEM, AFM, High Speed AFM, STM...)
- Surface Molecules Self-Assembly
- Surface Nanopatterning

Papers are acceptable provided they report important findings, novel insights or useful techniques within the scope of the journal. All manuscript must be prepared in English, and are subjected to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by prints in hard copy. It will be available through [http://www.scirp.org/journal/jsemat/](http://www.scirp.org/journal/jsemat/).

**Notes for Intending Authors**

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
