MODELING AND NUMERICAL SIMULATION OF MATERIAL SCIENCE
Journal Editorial Board

ISSN: 2164-5345 (Print) ISSN: 2164-5353 (Online)
http://www.scirp.org/journal/mnsms

Honorary Editor in Chief
Prof. Kiet Tieu University of Wollongong, Australia

Executive Editor in Chief
Prof. Hai-Liang Yu Shenyang University, China

Editorial Board
Dr. Jean-Pierre Badiali Research Director of Exceptional Class, France
Dr. François Barthelat McGill University, Canada
Prof. Roberto Brighenti University of Parma, Italy
Prof. Zhenshan Cui Shanghai Jiao Tong University, China
Dr. Shaogang Hao Iowa State University, USA
Dr. Chen Huang Theoretical Division, Los Alamos National Laboratory, NM, USA
Dr. Ayhan Ince General Dynamics Land Systems, Canada
Dr. Jinwu Kang Tsinghua University, China
Prof. Alexandre Ksenofontov National Research Nuclear University, Russia
Prof. Xianghua Liu Northeastern University, China
Dr. Yingtao Liu Arizona State University, USA
Dr. Jane Weizhen Lu City University of Hong Kong, China
Prof. Gilles Lubineau COHMAS Laboratory, Saudi Arabia
Dr. Scott T. Miller Applied Research Laboratory at Penn State, USA
Dr. Qing Peng Rensselaer Polytechnic Institute, USA
Dr. Hai Qing Siemens Wind Power, Denmark
Prof. Hou-Fa Shen Tsinghua University, China
Prof. Ashok Srvastava Louisiana State University, USA
Dr. Baolin Wang The University of New South Wales, Australia
Dr. Huanan Yu Washington State University, USA
Prof. Hamit Yurtseven Middle East Technical University, Turkey
Prof. Shi-Hong Zhang Chinese Academy of Sciences, China
TABLE OF CONTENTS

Volume 4  Number 1  January 2014

Heat Transfer Analysis during External Chilling of Composite Material Castings through Experimental and Finite Element (FE) Modelling
J. Hemanth.................................................................................................................................1

A Solute Pinning Approach to Solute Drag in Multi-Component Solid Solution Alloys
E. Hersent, K. Marthinsen, E. Nes................................................................................................8

Model for a UV Laser Based Local Polymer Surface Halogenation Process Using a Gaseous Precursor
S. Kibben..................................................................................................................................14

Numerical Simulation on Effects of Electromagnetic Force on the Centrifugal Casting Process of High Speed Steel Roll
M. H. Yuan, L. L. Cao, Y. Z. Xu, X. D. Song..........................................................................20

Finite Element Method Investigation of the Effect of Cold Expansion Process on Fatigue Crack Growth in 6082 Aluminum Alloy
A. Aid, Z. Semari, M. Benguediab.........................................................................................25

Finite Element Analysis of the Groove Pressing of Aluminum Alloy
M. S. Ghazani, A. Vajd...........................................................................................................32

Modelling of the Quantum Transport in Strained Si/SiGe/Si Superlattices Based P-i-n Infrared Photodetectors for 1.3 - 1.55 µm Optical Communication

Modeling and Numerical Simulation of Material Science (MNSMS)

Modeling and Numerical Simulation of Material Science

ISSN 2164-5345 (print)    ISSN 2164-5353 (online)
http://www.scirp.org/journal/mnsms

*Modeling and Numerical Simulation of Material Science (MNSMS)* is an international peer-reviewed, open access journal publishing in English original research studies, reviews and case reports in all aspects of Material Science. Symposia or workshop papers may be published as supplements.

**Honorary Editor in Chief**

Prof. Kiet Tieu  
University of Wollongong, Australia

**Executive Editor in Chief**

Prof. Hai-Liang Yu  
Shenyang University, China

**Subject Coverage**

All the manuscripts must be prepared in English, and are subject to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by printed hard copies. The journal publishes original papers including but not limited to the following fields:

- Application of modeling and numerical simulation methods in analysis of solidification, forming, welding, heat treatment, surface engineering, process of materials, include, ferrous metals and alloys, non-ferrous metals and alloys, biomaterials, carbons, ceramic materials, polymer, composites, and other advanced materials.

- New development of modeling and numerical simulations methods for analysis material processes, such as finite element method, finite difference method, boundary element method, slab method, crystal finite element method, CA, MD, statistical methods, artificial intelligence method.

**Notes for Intending Authors**

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

**Website and E-Mail**

What is SCIRP?
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

What is Open Access?
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
