# TABLE OF CONTENTS

Volume 3 Number 1A February 2013

**Signal Efficiency in Gradient Index Lens Based Two Photon Microscopy**  
A. Wingert, H. Seim, S. Schürmann, R. H. A. Fink, M. Vogel.................................................................43

**Methods to Be Developed for Some First Applications of Mitochondrial Filamentation**  
M. Gosalvez.................................................................................................................................................51

**Fluorescent Voltage Imaging Technique for the Measurement of Molluscan Neural Activities**  
Y. Hamasaki, M. Hosoi, S. Nakada, T. Shimokawa, M. Saito....................................................................54

**Polymer Supported Lipid Bilayers**  
I. P. McCabe, M. B. Forstner.......................................................................................................................59

**Cell Concentration and Separation in the Field of a Standing Ultrasonic Wave for Medicine and Biotechnology**  
D. G. Sadikova, T. N. Pashovkin..................................................................................................................70

**Error Corrected Sub-Monolayer Ellipsometry for Measurement of Biomolecular Interactions**  
U. Riss...............................................................................................................................................................76

**Innovative Use of Light-Weight Radioisotopes in Therapeutics and the Engineering of Light-Power Generators**  
A. Bennun.........................................................................................................................................................86

**Method for Tentative Evaluation of Membrane Permeability Coefficients for Sodium and Potassium Ions in Unicellular Organisms**  
A. T. Atanasov..............................................................................................................................................91

**Clinical Implementation of a 3D Dosimeter for Accurate IMRT and VMAT Patient Specific QA**  
T. Pham, J. Luo..............................................................................................................................................99

**Fluorescence as a Tool to Study Lipid-Protein Interactions: The Case of α-Synuclein**  
A. Gonzalez-Horta, B. G. Hernandez, A. Chavez-Montes.........................................................................112

The figure on the front cover is from the article published in Open Journal of Biophysics, 2013, Vol. 3, No. 1A, pp. 59-69 by Ian P. McCabe and Martin B. Forstner.

If expert assistance is required, the services of a competent professional person should be sought.

PRODUCTION INFORMATION

For manuscripts that have been accepted for publication, please contact:
E-mail: ojbiphy@scirp.org
Open Journal of Biophysics (OJBIPHY) is an international journal dedicated to the latest advancement of biophysics. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of biophysics.

Subject Coverage

All manuscripts must be prepared in English, and are subject to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by printed hard copy. The journal publishes original papers including but not limited to the following fields:

- Bioelectromagnetics
- Bioenergetics
- Bioinformatics and Computational Biophysics
- Biological Imaging
- Biomedical Imaging and Bioengineering
- Biophysics of Disease
- Biophysics of Photosynthesis
- Cardiovascular Biophysics
- Cell Biophysics
- Medical Biophysics
- Membrane Biophysics
- Molecular Biophysics and Structural Biology
- Physical Methods
- Physiology and Biophysics of the Inner Ear
- Proteins and Nucleic Acids Biophysics
- Radiobiology
- Receptors and Ionic Channels Biophysics
- Sensory Biophysics and Neurophysiology
- Systems Biophysics
- Theoretical and Mathematical Biophysics

We are also interested in: 1) Short Reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews—Comments and critiques.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

Website and E-Mail

What is SCIRP?
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

What is Open Access?
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

• High visibility for maximum global exposure with open access publishing model
• Rigorous peer review of research papers
• Prompt faster publication with less cost
• Guaranteed targeted, multidisciplinary audience
