Editor in Chief
Prof. Heuy-Dong Kim Andong National University, South Korea

Associate Editor
Dr. Mohammad Mehdi Rashidi Bu-Ali Sina University, Iran

Editorial Board
Prof. Saeid Abbasbandy Imam Khomeini International University, Iran
Prof. William E. Acree, Jr. University of North Texas, USA
Prof. Ramesh K. Agarwal Washington University in St. Louis, USA
Prof. Mostafa Barigou The University of Birmingham, UK
Prof. Bin Chen Xi’an Jiaotong University, China
Prof. Juergen Czarske University of Technology, Germany
Dr. Jiannong Fang École Polytechnique Fédérale de Lausanne, Switzerland
Prof. Sandip Ghosal Northwestern University, USA
Dr. Anup Gokarn Flow Science Inc., USA
Prof. Mohamed Abdel-Aziz Mostafa Habib Fahd University of Petroleum and Minerals, Saudi Arabia
Prof. Yongjun Jian Inner Mongolia University, China
Prof. Russell G. Keanini University of North Carolina, USA
Prof. M. Masud K. Khan Central Queensland University, Australia
Dr. Rajan Kumar Florida State University, USA
Prof. Chao-An Lin National Tsing Hua University, Chinese Taipei
Dr. Zhanke Liu Schlumberger Technology Corporation, USA
Prof. Mario Mlsale University of Genoa, Italy
Dr. Khaled A. Sallam Oklahoma State University, USA
Prof. Richard Saurel Aix-Marseille University, France
Prof. José R. Serrano Universidad Politécnica de Valencia, Spain
Prof. Zhi-Qiang Shao Fuzhou University, China
Dr. Bhupendra Kumar Sharma BITS Pilani, India
Prof. Gui-Hua Tang Xi’an Jiaotong University, China
Dr. Makoto Umeki University of Tokyo, Japan
Dr. Guiren Wang University of South Carolina, USA
Prof. Lian-Ping Wang College of Engineering, USA
Dr. Bai Wei National University of Singapore, Singapore
Prof. Jin-Jia Wei Xi’an Jiaotong University, China
Prof. Chao Yang Chinese Academy of Sciences, China
Prof. Hamit Yurtseven Middle East Technical University, Turkey
## TABLE OF CONTENTS

**Volume 3 Number 4**

### December 2013

- **Study on Stack Effect of Stairwell by Numerical Model of Leakage Flow through Gap of Door**  
  J.-Y. Kim, J.-S. Kim .......................................................... 241

- **Mechanical Analysis of Viscous- Elastic Fluid Acting on Residual Oil in the Micro Pore**  
  L. L. Liu, C. Yu, L. H. Wang, C. C. Y. Fu, P. X. Li .......................................................... 248

- **Numerical Analysis of the Losses in Unsteady Flow through Turbine Stage**  
  S. Dykas, W. Wróblewski, D. Machalica .......................................................... 252

- **Study on the Wake Shape behind a Wing in Ground Effect Using an Unsteady Discrete Vortex Panel Method**  
  C. Han, S. A. Kinnas .......................................................... 261

- **Numerical Simulation of Hydraulic Transport of Sand-Water Mixtures in Pipelines**  
  C. Kim, C. Han .......................................................... 266

- **MHD Effect on an Oscillatory Mixed Convective Flow Past an Infinite Vertical Porous Plate with Radiation**  
  N. Ahmed, S. Sinha .......................................................... 271

- **MHD Transient Flow with Hall Current Past an Accelerated Horizontal Porous Plate in a Rotating System**  
  N. Ahmed, J. K. Goswami, D. P. Barua .......................................................... 278

- **Effect of Laryngopharyngeal Anatomy on Expiratory Airflow and Submicrometer Particle Deposition in Human Extrathoracic Airways**  
  X. Si, J. Xi, J. Kim .......................................................... 286

- **Performance Evaluation of Heat Exchangers in OTEC Using Ammonia/Water Mixture as Working Fluid**  
  T. Morisaki, Y. Ikegami .......................................................... 302

- **Near Wake of a Horizontal Circular Cylinder in Stably Stratified Flows**  
  Y. Ohyay, T. Uchida, T. Nagai .......................................................... 311

- **Direct Numerical Simulation of a Jet Issuing from Rectangular Nozzle by the Vortex in Cell Method**  
  T. Uchiyama, M. Kobayashi, S. Ito, T. Ikeda .......................................................... 321

- **Experimental and Numerical Study of Dilute Gas-Solid Flow inside a 90° Horizontal Square Pipe Bend**  
  W. A. Aissa, T. A. M. Mekhail, S. A. Hassanein, O. Hamdy .......................................................... 331

- **A New Large Scale Instability in Rotating Stratified Fluids Driven by Small Scale Forces**  
  A. Tur, M. Chabane, V. Yanovsky .......................................................... 340

---

The figure on the front cover is from the article published in Open Journal of Fluid Dynamics, 2013, Vol. 3, No. 4, pp. 311-320 by Yuji Ohya, *et al.*

Open Journal of Fluid Dynamics (OJFD) is an international journal dedicated to the latest advancement of fluid dynamics. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of applied science.

Editor in Chief
Prof. Heuy-Dong Kim
Andong National University, South Korea

Associate Editor
Dr. Mohammad Mehdi Rashidi
Bu-Ali Sina University, Iran

Editorial Board
Prof. Saeid Abbasbandy
Prof. William E. Acree, Jr.
Prof. Ramesh K. Agarwal
Prof. Mostafa Barigou
Prof. Bin Chen
Prof. Juergen Czarske
Dr. Jianrong Fang
Prof. Sandip Ghosal
Dr. Anup Gokarn
Prof. Mohamed Abdel-Aziz Mostafa Habib
Prof. Yongjun Jian
Prof. Russell G. Keanini
Prof. M. Masud K. Khan
Dr. Rajan Kumar
Prof. Chao-An Lin
Dr. Zhanke Liu
Prof. Mario Mlsale
Dr. Khaled A. Sallam
Prof. Richard Saurel
Prof. José R. Serrano
Prof. Zhi-Qiang Shao
Dr. Bhupendra Kumar Sharma
Prof. Gui-Hua Tang
Dr. Makoto Umeki
Dr. Guiрен Wang
Prof. Lian-Ping Wang
Dr. Bai Wei
Prof. Jin-Jia Wei
Prof. Chao Yang
Prof. Hamit Yurtseven

Subject Coverage
All manuscripts must be prepared in English, and are subject to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by printed hard copy. The journal publishes original papers including but not limited to the following fields:

<table>
<thead>
<tr>
<th>Aerodynamics</th>
<th>Free Shear Layer Flow</th>
<th>Non-Newtonian Flow</th>
</tr>
</thead>
<tbody>
<tr>
<td>Boundary Layer Flow</td>
<td>High-Speed Flow</td>
<td>Physical-Chemical Hydrodynamics</td>
</tr>
<tr>
<td>Combustion and Reacting Flow</td>
<td>Hydrodynamic</td>
<td>Plasma Dynamics</td>
</tr>
<tr>
<td>Compressible Flow</td>
<td>Jet and Wake Flow</td>
<td>Radiation Hydrodynamics</td>
</tr>
<tr>
<td>Computational Fluid Dynamics</td>
<td>Magnetic Fluid</td>
<td>Rotating and Stratified Fluid</td>
</tr>
<tr>
<td>Environmental Fluid Dynamics</td>
<td>Micro and Nano Fluidics</td>
<td>Rotating Flow</td>
</tr>
<tr>
<td>Environmental Fluid Mechanics</td>
<td>Micro Fluid Dynamics</td>
<td>Seepage Mechanics</td>
</tr>
<tr>
<td>Experimental Fluid Mechanics</td>
<td>Multi-Phase Flow</td>
<td>Theoretical Fluid Dynamics</td>
</tr>
<tr>
<td>Fluid Mechanics</td>
<td>Multiphase Fluid Dynamics</td>
<td>Turbulence Theory</td>
</tr>
<tr>
<td>Fluid-Structure Interaction</td>
<td>Naval Hydrodynamics</td>
<td>Viscous Fluid</td>
</tr>
</tbody>
</table>

We are also interested in: 1) Short Reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews—Comments and critiques.

Notes for Prospective Authors
Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

What is SCIRP?
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

What is Open Access?
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
