Editor-in-Chief
Prof. Heuy-Dong Kim
Andong National University, South Korea

Associate Editor
Prof. Mohammad Mehdi Rashidi
Bu-Ali Sina University, Hamedan, Iran

Editorial Board
Prof. Saeid Abbabandy
Imam Khomeini International University, Iran
Prof. Ramesh K. Agarwal
Washington University in St. Louis, USA
Prof. Mostafa Barigou
The University of Birmingham, UK
Prof. Bin Chen
Xi’an Jiaotong University, China
Prof. Juergen Czarske
University of Technology, Germany
Prof. Sandip Ghosal
Northwestern University, USA
Prof. Anup Gokarn
Flow Science Inc., USA
Prof. Russell G. Keanini
University of North Carolina, USA
Prof. M. Masud K. Khan
Central Queensland University, Australia
Dr. Rajan Kumar
Florida State University, USA
Prof. Mario Mlsale
University of Genoa, Italy
Prof. Tohru Ozawa
Waseda University, Japan
Dr. Khaled A. Sallam
Oklahoma State University, USA
Prof. Richard Saurel
Aix-Marseille University, France
Prof. José R. Serrano
Universidad Politécnica de Valencia, Spain
Dr. Bhupendra Kumar Sharma
BITS Pilani, India
Dr. Makoto Umeki
University of Tokyo, Japan
Dr. Bai Wei
National University of Singapore, Singapore
Prof. Hamit Yurtseven
Middle East Technical University, Turkey
# Table of Contents

**Volume 5  Number 1  March 2015**

**Acoustic Absorption Characteristics of Perforated Thin Plate with Air Jets and Cavity**
H. Hamakawa, H. Matsuoka, T. Yamai, K. Asakura, T. Otsuru, R. Tomiku,
E. Kurihara, H. Hayashi, E. Nishida..............................................................................................................1

**A Semi-Implicit Scheme of Lattice Boltzmann Method for Two Dimensional Cavity Flow Simulation**
L. Zhang, J. Yao, H. Sun, J. G. Zhang..............................................................................................................10

**Visualization of Traveling Vortices in the Boundary Layer on a Rotating Disk under Orbital Motion**
M. Munekata, K. Kubo, H. Yoshikawa.............................................................................................................17

**Numerical Study of RBC Motion and Deformation through Microcapillary in Alcohol Plasma Solution**
A. Ni, T. A. Cheema, C. W. Park......................................................................................................................26

**Possibility of a Straightening Flow-Meter by Using Woven Screen**
T. Tsuchiya, Y. Koishi, M. Iwamoto, H. Yamada..............................................................................................34

**Numerical Investigation of Effective Heat Conductivity of Fluid in Charging Process of Thermal Storage Tank**
H. Taheri, F. P. Schmidt, M. Gabi.....................................................................................................................39

**A Short Note on Self-Similar Solution to Unconfined Flow in an Aquifer with Accretion**
A. Pistiner..........................................................................................................................................................51

**Rheological Properties of Casting Solutions for Starch Edible Films Production**
P. Huo, T. Savitskaya, L. Gotina, I. Reznikov, D. Grinspan.............................................................................58

**Impact of the Housing on the Air Flow and the Thermal Behavior of an Automotive Clutch System**
A. Levillain, P. Brassart, B. Patte-Roulund.......................................................................................................68

**Kinetic Foundation for the Multimoment Hydrodynamics Equations**
I. V. Lebed.........................................................................................................................................................76

**Experimental and Numerical Investigations on Plate-Type Heat Exchanger Performance**
Y. Ikekami, S. Mutair, Y. Kawabata................................................................................................................92

---

The figure on the front cover is from the article published in Open Journal of Fluid Dynamics, 2015, Vol. 5, No. 1, pp. 17-25 by Mizue Munekata, Keiichiro Kubo and Hiroyuki Yoshikawa.

Open Journal of Fluid Dynamics

 ISSN: 2165-3852 (print) ISSN: 2165-3860 (online)
 www.scirp.org/journal/ojfd

Open Journal of Fluid Dynamics (OJFD) is an international journal dedicated to the latest advancement of fluid dynamics. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of applied science.

Editor-in-Chief
Prof. Heuy-Dong Kim
Andong National University, South Korea

Associate Editor
Prof. Mohammad Mehdi Rashidi
Bu-Ali Sina University, Iran

Editorial Board
Prof. Saeid Abbaspandy
Dr. Khaled A. Sallam
Prof. Ramesh K. Agarwal
Prof. Richard Saurel
Prof. Mostafa Barigou
Prof. José R. Serrano
Prof. Bin Chen
Dr. Bhupendra Kumar Sharma
Prof. Juergen Czarske
Dr. Makoto Umeki
Prof. Sandip Ghosal
Dr. Bai Wei
Prof. Anup Gokarn
Prof. Hamit Yurtseven
Prof. Russell G. Keanini

Subject Coverage
All manuscripts must be prepared in English, and are subject to a rigorous and fair peer-review process. Accepted papers will immediately appear online followed by printed hard copy. The journal publishes original papers including but not limited to the following fields:

- Aerodynamics
- Bio-Fluid Mechanics
- Boundary Layer Flow
- Combustion and Reacting Flow
- Compressible Flow
- Computational Fluid Dynamics
- Environmental Fluid Dynamics
- Environmental Fluid Mechanics
- Experimental Fluid Mechanics
- Fluid Mechanics
- Fluid-Structure Interaction
- Free Shear Layer Flow
- Heat and Mass Transfer
- High-Speed Flow
- Hydrodynamic
- Jet and Wake Flow
- Magnetic Fluid
- Micro and Nano Fluidics
- Micro Fluid Dynamics
- Multi-Phase Flow
- Multiphase Fluid Dynamics
- Naval Hydrodynamics
- Non-Newtonian Flow
- Non-Newtonian Fluid Mechanics
- Physical-Chemical Hydrodynamics
- Plasma Dynamics
- Radiation Hydrodynamics
- Rotating and Stratified Fluid
- Rotating Flow
- Seepage Mechanics
- Theoretical Fluid Dynamics
- Turbulence Theory
- Viscous Fluid

We are also interested in: 1) Short Reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews—Comments and critiques.

Notes for Prospective Authors
Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. All papers are refereed through a peer review process. For more details about the submissions, please access the website.

Website and E-Mail

What is SCIRP?
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science with its publication.

What is Open Access?
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, worldwide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
