Editors-in-Chief

Prof. Emilio Bucio
National University of Mexico, Mexico

Prof. Arno Seeboth
Fraunhofer Institute for Applied Polymer Research, Germany

Editorial Board

Prof. Luc Averous
University of Strasbourg, France

Dr. Durairaj Baskaran
University of Tennessee, USA

Dr. Jeanette M. Cardamone
Eastern Regional Research Center, USA

Dr. Zhengdong Cheng
Texas A&M University, USA

Prof. Ranganathaiah Chikkakuntappa
University of Mysore, India

Prof. Adel Z. El-Sonbati
Mansoura University, Egypt

Prof. Yakai Feng
Tianjin University, China

Prof. Chang-Sik Ha
Pusan National University, South Korea

Dr. Ichiro Imae
Hiroshima University, Japan

Prof. Beom Soo Kim
Chungbuk National University, South Korea

Prof. Sang Hak Lee
Kyunpook National University, South Korea

Prof. Junqiu Liu
Jilin University, China

Prof. Tarek M. Madkour
The American University in Cairo, Egypt

Prof. Rinaudo Marguerite
Joseph Fourier University, France

Prof. Placido Mineo
University of Catania, Italy

Dr. Ajay Kumar Mishra
University of Johannesburg, South Africa

Dr. Michael R. Roner
University of Texas at Arlington, USA

Prof. Kestur Gundappa Satyanarayana
B.M.S. College of Engineering, India

Prof. De-Yi Wang
Leibniz Institute of Polymer Research, Germany

Prof. Jinying Yuan
Tsinghua University, China

Dr. Shin-ichi Yusa
University of Hyogo, Japan

Open Journal of Polymer Chemistry (OJPChem) is an international peer-reviewed, open-access journal dedicated to the latest advancement of polymer chemistry. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and perspectives in polymer chemistry and related disciplines.

**Editors-in-Chief**
Prof. Emilio Bucio  
National University of Mexico, Mexico  
Prof. Arno Seebeth  
Fraunhofer Institute for Applied Polymer Research, Germany

**Editorial Board**

**Subject Coverage**
The journal publishes original papers including but not limited to the following fields:

- Application of Polymers and Water Research and Membrane
- Behavior and Propriety of Polymers in Solid-State, Melt-State or Solution
- Biopolymers
- Characteristics and Properties of Polymer/Inorganic Hybrid Systems
- Chemical Modifications of Natural and Synthetic Polymers for New End-Use Applications
- Functional and Advanced Polymers
- New Architectural Polymers
- Polymer Characterization
- Polymer Physical Chemistry
- Polymerization Kinetics and Mechanisms
- Synthesis and Properties of Macromolecules
- Synthesis-Structure Relationships
- Synthetic Polymers

We are also interested in: 1) Short Reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews—Comments and critiques.

**Notes for Intending Authors**
Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submission, please access the website.

What is SCIRP?
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science, by delivering superior scientific publications and scientific information solution provider that enable advancement in scientific research.

What is Open Access?
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, world-wide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
