# Table of Contents

**Volume 4 Number 4 November 2014**

**Bio-Based Polymers for Technical Applications: A Review—Part 2**  
K. F. Adekunle

**Crystallization and Crystalline Structure of Syndiotactic Polypropylene and Syndiotactic-Poly(1-Butene) Blend**  
N. Naga, Y. Takagi, S. Urakami, K. Noguchi

**Synthesis and Characterization of Novel Sulphanilamide/Epoxy Resin Modified Polyester for Thermal Stability and Impact Strength**  
M. H. M. Alhousami, A. S. N. Al-Kamali, A. A. Athawale

Open Journal of Polymer Chemistry (OJPChem) is an international peer-reviewed, open-access journal dedicated to the latest advancements in polymer chemistry. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and perspectives in polymer chemistry and related disciplines.

Subject Coverage
The journal publishes original papers including but not limited to the following fields:

- Application of Polymers and Water Research and Membrane
- Behavior and Propriety of Polymers in Solid-State, Melt-State or Solution
- Biopolymers
- Characteristics and Properties of Polymer/Inorganic Hybrid Systems
- Chemical Modifications of Natural and Synthetic Polymers for New End-Use Applications
- Functional and Advanced Polymers
- New Architectural Polymers
- Polymer Characterization
- Polymer Physical Chemistry
- Polymerization Kinetics and Mechanisms
- Synthesis and Properties of Macromolecules
- Synthesis-Structure Relationships
- Synthetic Polymers

We are also interested in: 1) Short Reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews—Comments and critiques.

Notes for Intending Authors
Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically through the website. All papers are refereed through a peer review process. For more details about the submission, please access the website.

What is SCIRP?
Scientific Research Publishing (SCIRP) is one of the largest Open Access journal publishers. It is currently publishing more than 200 open access, online, peer-reviewed journals covering a wide range of academic disciplines. SCIRP serves the worldwide academic communities and contributes to the progress and application of science with its publication.

What is Open Access?
All original research papers published by SCIRP are made freely and permanently accessible online immediately upon publication. To be able to provide open access journals, SCIRP defrays operation costs from authors and subscription charges only for its printed version. Open access publishing allows an immediate, worldwide, barrier-free, open access to the full text of research papers, which is in the best interests of the scientific community.

- High visibility for maximum global exposure with open access publishing model
- Rigorous peer review of research papers
- Prompt faster publication with less cost
- Guaranteed targeted, multidisciplinary audience
