PRODUCTION INFORMATION

For manuscripts that have been accepted for publication, please contact:
E-mail: ojrad@scirp.org
Open Journal of Radiology (OJRAd) is an international peer-reviewed, open-access journal dedicated to presenting the latest advancement in medical imaging. The Journal is interested in presenting a wide range of imaging topics of interest to the medical community. These would include imaging developments: 1) for diagnosis of disease and 2) for guiding and/or evaluating a therapeutic treatment. The journal is also interested in presenting research articles of general interest to the imaging community, for example: image acquisition, processing, multimodality image registration and segmentation. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of radiology.

Subject Coverage

The journal publishes original papers including, but not limited to the following subfields of radiology:

◆ Acquisition of radiological images
◆ Computed Tomography (CT)
◆ Fluoroscopy
◆ Interventional radiology
◆ MRI (Magnetic Resonance Imaging)
◆ Nuclear medicine
◆ Projection (plain) radiography
◆ Radiologist training
◆ Teleradiology
◆ Ultrasound

We are also interested in: 1) Short Reports—2-5 page papers where an author can either present an idea with theoretical background but has not yet completed the research needed for a complete paper or preliminary data; 2) Book Reviews—Comments and critiques.

Notes for Intending Authors

Submitted papers should not have been previously published nor be currently under consideration for publication elsewhere. Paper submission will be handled electronically from the website. All papers are refereed through a peer review process. For more details about the submissions, please access the website.
