Open Journal of Safety Science and Technology (OJSST) is an international peer-reviewed, open access journal publishing in English original research studies, reviews in all aspects of branches of science. Symposia or workshop papers may be published as supplements.

Subject Coverage

The field of Safety Science and Technology is the most challenging and hot topic among all branches of science. This field is also quite interdisciplinary in character. OJSST aims to publish research papers in the following areas:

- Blast safety
- Bridge safety engineering
- Coal, gas and rock burst
- Construction and building safety
- Dam safety
- Emergency management and evacuation
- Explosion performance and safety of hazardous materials
- Fatigue, lifetime and reliability
- Fire control and extinguishing
- Fire experiment and property research
- Fire extinguishing agent and fire equipment
- Gas and dust control in coal mine
- Gas explosion and safety
- Leakage of combustible and toxic materials
- Numerical simulation of fire
- Occupational health and human behavior
- Performance and process of burning
- Public security
- Safety assessment and risk analysis
- Safety management
- Safety monitoring and supervision
- Safety of chemical reaction tank and pressure vessel
- Safety of tunnel and metro construction
- Slope stability
- Smoke control
- Spontaneous combustion in coal mine
- Theories and methods of safety science
- Traffic and transportation safety
- Ventilation
- Work safety in coal mine
- Other aspects of safety science and technology
