HYDROFLUORIC ACID
The penetration capacity of the Fluoride ion and the Acid

Only Fluoride ions
No penetration = No scattering of the toxic fluoride ions

Only Acid
Penetration = corrosive injury occurs

Both Acid and Fluoride ions
The acid opens up for the toxic fluoride ions to spread out into the body

Dr. Panagiotis Mitropoulos  
San Diego State University, USA

Dr. Yuichi Otsuka  
Nagaoka University of Technology, Japan

Dr. K. Balaji Rao  
CSIR-Structural Engineering Research Centre, India

Prof. Chi-Min Shu  
National Yunlin University of Science and Technology (YunTech), Chinese Taipei

Prof. Isabelle Sochet  
Industrial Risk Engineering Department, Institute of Technology INSA Centre Val de Loire, France

Dr. Paolo Vestrucci  
University of Bologna, Italy

Dr. Xin Ye  
California State Polytechnic University, USA
### Table of Contents

**Volume 6  Number 4  December 2016**

**For a Safer Working Environment with Hydrofluoric Acid in Iraqi Industrial Plants**
A. Abd Ali, N. Shaalan, W. Al-Dahhan, E. Yousif…………………………………………………………………………. …77

**Environmental and Occupational Pollutants and Their Effects on Health among Brick Kiln Workers**
S. Sanjel, S. M. Thygerson, S. N. Khanal, S. K. Joshi……………………………………………………………………………81

**Application of a Configurable Model for Risk Assessment in the Work Sites**
F. O. Nunes…………………………………………………………………………………………………………………...… 99

**Contribution to the Definition of a New Type of More Technological Ambulance: Use Case of French Civil Security Ambulances**
S. Mallek, S. Sauvagnargues, F. Tena-Chollet, B. Charrel, I. Arnaud……………………………………………………..…126

**Anthropometrics of University Students in Northern Mexico**
J. L. Hernandez-Arellano, G. Talavera-Aguirre, J. N. Serratos-Perez,
A. A. Maldonado-Macias, J. L. Garcia-Alcaraz……………………………………………………………………………....143

The figure on the front cover is from the article published in Open Journal of Safety Science and Technology, 2016, Vol. 6, No. 4, pp. 77-80 by Ali Abd AliI, Naser Shaalan, Wedad Al-Dahhan and Emad Yousif.

Open Journal of Safety Science and Technology (OJSST) is an openly accessible journal published quarterly. The goal of this journal is to provide a platform for scientists and academicians all over the world to promote, share, and discuss various new issues and developments in different areas of safety science and technology.

Editors-in-Chief
Prof. Singiresu S. Rao
University of Miami, USA
Dr. Jo-Ming Tseng
Central Taiwan University of Science and Technology, Chinese Taipei

Subject Coverage

The field of Safety Science and Technology is the most challenging and hot topic among all branches of science. This field is also quite interdisciplinary in character. OJSST aims to publish research papers in the following areas:

- Aerospace vehicle safety
- Blast safety
- Bridge safety engineering
- Chemical health and safety
- Coal, gas and rock burst
- Construction and building safety
- Dam safety
- Drug safety
- Ecotoxicology and environmental safety
- Emergency management and evacuation
- Explosion performance and safety of hazardous materials
- Fatigue, lifetime and reliability
- Fire control and extinguishing
- Fire experiment and property research
- Fire extinguishing agent and fire equipment
- Food safety
- Gas and dust control in coal mine
- Gas explosion and safety
- Human factors and ergonomics
- Leakage of combustible and toxic materials
- Machinery safety
- Numerical simulation of fire
- Occupational health and human behavior
- Patient safety in surgery
- Performance and process of burning
- Public security
- Robot safety
- Safety assessment and risk analysis
- Safety engineering
- Safety management
- Safety monitoring and supervision
- Safety of chemical reaction tank and pressure vessel
- Safety of tunnel and metro construction
- Slope stability
- Smoke control
- Spontaneous combustion in coal mine
- Structural safety
- Theories and methods of safety science
- Traffic and transportation safety
- Ventilation
- Work safety in coal mine
- Other aspects of safety science and technology
